Re: Proposed NPDES Permit for Foster Poultry Farms, Inc. – ADDENDUM

Dear Ms. Everett:

Please find attached a document we came into possession of just today. We are incorporating this by reference into our comments on the Foster Farms draft permit with regard to the setting of technology-based and water quality-based effluent limits for this discharger, specifically DEQ's failure to establish adequate TBELs and WQBELs and to explain how it chose the effluent limits and other conditions included in the draft permit.

Sincerely,

Nina Bell
Executive Director
