

Jellyfish Toxic Algae No Oxygen for Life . . .

This is Puget Sound water quality today. And it's predicted to get worse as the region's population continues to grow.

What?

Nitrogen pollution.

Where?

Sewage treatment plants
for cities and towns.

Why?

Pure and simple: the Washington Department of Ecology continues to issue illegal water pollution discharge permits to Puget Sound with no limits on nitrogen.

What's being done?

Northwest Environmental
Advocates has petitioned the
U.S. Environmental Protection
Agency asking it to put an end
to Washington's illegal water
pollution discharge permits.

2/2017

Petition to EPA Seeks End to Illegal Permits Sucking the Oxygen from Puget Sound
